

Teamspeak 3 soon to be Released?

24/08/2009 16:46 by Manstein

[Teamspeak 3](#) Well it appears there is good reason the development of Teamspeak 3 has taken years. Some of the latest teasers from their [developers blog](#) show it's beginning to look like a polished product with tons of new and improved features. Connect to multiple servers and jump between them with tabs Whisper to a single user, or groups of users, for ultimate command and control Built-in file sharing and the ability to send offline messages Customize the appearance, location, and function of the control bars and UI Community developed mods and built-in support in some games such as Americas Army III
